Geochim. et Cosmochim. Acta

EDITORS

Dr. L. H. Ahrens, *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa.*

Prof. C. W. Correns, *Sedimentpetrographisches Institut der Universität, Lotzestr. 13, Gtötingen, Germany.*

Dr. E. Ingerson, *Geochemistry and Petrology Branch, U.S. Geological Survey, Washington 25, D.C., U.S.A.*

Dr. S. R. Nockolds, *Department of Mineralogy and Petrology, The University, Cambridge, England.*

Prof. F. A. Paneth, F.R.S., *Max-Planck-Institut für Chemie, Mainz, Saarstrasse 23, Germany.*

Prof. H. C. Urey, For. Mem. R.S., *The Enrico Fermi Insititute for Nuclear Studies, University of Chicago, Illinois, U.S.A.*

Dr. John Verhoogen, *Department of Geology, University of California, Berkeley, California, U.S.A.*

Prof. A. P. Vinogradov, *The Academy of Sciences of the U.S.S.R., Moscow, U.S.S.R.*

Prof. L. R. Wager, F.R.S., *Department of Geology and Mineralogy, The University, Oxford, England.*

Prof. F. E. Wickman, *Naturhistoriska Riksmuseets, Mineralogiska Avdelning, Stockholm 50, Sweden.*

I. GENERAL

1. Papers on Geochemistry should be submitted to the editors for the appropriate country or language (*Papers on Cosmochemistry should be sent to Prof. F. A. Paneth, F.R.S.*). Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as "Letters to the Editors." Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the Editors from time to time. The Journal will appear as independent and complete numbers, which will be sold separately and combined into volumes of about 300 pages.

2. Only papers which have not been previously published will be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta.*

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French, or German.

2. The script should be an original typewritten copy (not a carbon). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be re-drawn should include all relevant details. Half-tone illustrations should be restricted to the minimium necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet.

4. References in the text should be given by quoting the author's name and year of publication, i.e. Ahrens (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

Ahrens, L. H. (1952) *Geochim. et Cosmochim. Acta 2*, 168.

and should include the standard abbreviated title of the journal, year, volume number, and page number.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the Editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

CONTENTS

Nos. 1/2

PAGE

KONRAD B. KRAUSKOPF: Dissolution and precipitation of silica at low temperatures . 1

DONALD E. WHITE, W. W. BRANNOCK, and K. J. MURATA: Silica in hotspring waters . 27

R. E. FOLINSBEE, J. LIPSON, and J. H. REYNOLDS: Potassium-argon dating . . 60

KARL HANS WEDEPOHL: Untersuchungen zur Geochemie des Bleis 69

Letter to the Editors:

JOSEPH I. LIPSON: K-A dating of sediments 149

Book Review:

"Gmelins Handbuch der anorganischen Chemie" (reviewed by C. W. CORRENS) . 152

No. 3

G. J. WASSERBURG, R. J. HAYDEN, and KENNETH J. JENSEN: A^{40}–K^{40} dating of igneous rocks and sediments 153

S. DEUTSCH, F. G. HOUTERMANS, and E. E. PICCIOTTO: Etudes de la radioactivité de météorites metàlliques par la méthode photographique 166

A. PARWEL, H. v. UBISCH, and F. E. WICKMAN: On the variations in the relative abundance of boron isotopes in nature 185

P. M. JEFFERY: The radioactive age of four Western Australian pegmatites by the potassium and rubidium methods 191

Letter to the Editors:

C. J. LIEBENBERG: The spectrochemical determination of Cs in igneous rocks using a chemical concentration procedure 196

No. 4

J. E. HAWLEY and GRAHAM MACDONALD: Quantitative spectrochemical analyses of some silicate and carbonate rocks and iron ores with the Stallwood air jet 197

S. R. TAYLOR, C. H. EMELEUS, and C. S. EXLEY: Some anomalous K/Rb ratios in igneous rocks and their petrological significance 224

CLAIRE PATTERSON: Age of meteorites and the earth 230

Geochemical Note:

L. T. ALDRICH, G. W. WETHERILL, and G. L. DAVIS: Determination of radiogenic Sr^{87} and Rb^{87} of an interlaboratory series of lepidolites 238

Letter to the Editors:

FRANCIS A. RICHARDS: On the state of our knowledge of trace elements in the ocean . 241

Book Reviews:

"L'evolution de la Lithosphere. I. Pétrogénèse" by HENRI and GENEVIÈVE TERMIER (reviewed by T. F. W. BARTH) 244

"Microscopic Petrography" by E. WM. HEINRICH (reviewed by T. F. W. BARTH) . 244

PAGE

KARL K. TUREKIAN and J. LAURENCE KULP: The geochemistry of strontium . . 245

A. E. RINGWOOD: Melting relationships of Ni-Mg olivines and some geochemical implications 297

PER GEIJER: Pre-Cambrian atmosphere: evidence from the Pre-Cambrian of Sweden . 304

A. J. MAJUMDAR and RUSTUM ROY: Fugacities and free energies of CO_2 at high pressures and temperatures 311

GEORGE T. FAUST, K. J. MURATA, and JOSEPH J. FAHEY: Relation of minor-element content of serpentines to their geological origin 316

Geochemical Notes:

SAYED A. WARDANI: Germanium in meteorites 321

D. F. C. MORRIS: The association of nickel with cinnabar 322

Book Review:

"Cosmologie et Chimie" by ALEXANDRE DAUVILLIER (reviewed by F. A. PANETH) . 324
